EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Before the "FIELD OF THE INVENTION" section on page 1 of the specification, insert the following section:

-- RELATED APPLICATIONS

This application is a continuation of U.S. Patent Application Serial No. 09/773,204, filed on January 31, 2001, now abandoned. --

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Of particular relevance in this application is the Bechtold reference which was applied in rejections in the parent application (e.g. see paragraphs 2-7 of Paper No. 7 of the parent). Applicant has now

Art Unit: 1775

presented claims that distinguish over the Bechtold reference in that they require substantially complete bonding of at least 80% of the interfacial region being metallurgical bonding. As noted in applicant's comparative example C, the Bechtold reference would not be expected to meet this limitation. Regarding the Oakes reference, applicant successfully argues against motivation for the combination of Oakes with Bechtold in the Response received August 11, 2003 (Paper No. 8 of the parent). While the prior art of record is replete with bonded curved surfaces, none of the prior art references of record discloses or makes obvious the combination of wrought supported gold with the interfacial metallurgical bonding currently required by the claims. Pending claims 1-12 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

The information disclosure statement filed with this application has been considered and an initialed form PTO-1449 is enclosed with this correspondence. These references, as well as those cited on the enclosed form PTO-892, were considered in the parent application. No copies of the references cited on the PTO-892 have been provided as copies were previously provided in the parent application.
